

Bee City USA - Greenwood

Report on 2020

Pollinator Habitat Creation & Enhancement

We were on Making it Grow, a show by Clemson University about pollinator gardens and Monarch WayStations

Education & Outreach

We produced an educational sign for our Rain Garden and had it in two local papers. We also posted it on social media. We also put together a plant scavenger hunt to educate since we couldn't have events this year because of covid. The Bee City USA Greenwood committee was also involved in filming of the Making it Grow segment

Filming the Making it Grow segment.

An educational sign for the Bee City booth.

Policies & Practices

We use beneficial insects and soap and oil sprays only. I am working with the director of public works on a IPM policy.
