Report on 2020

Pollinator Habitat Creation & Enhancement

The COVID-19 pandemic really put a halt to a lot of projects and volunteer events. Though we did not actively have any projects started in 2020, we do have things in the works for 2021.

Education & Outreach

In 2020 we partnered with Georgetown University to host a Pollinator Porch Parade where residents decorated their porches or yards with information about pollinators. This was a great way for people walking or riding their bikes to read and learn about pollinators in a creative socially distanced way. We had residences, businesses, and architecture firms participate. It was a great event in spite of the pandemic.
