

Bee Campus USA - Chatham University - Eden Hall

Report on 2024

Pollinator Habitat Creation & Enhancement

Please describe pollinator habitat creation or enhancement projects in your community in 2024, and whether your committee hosted them or not.

n/a

How many habitat projects did you help to create or enhance in 2024?

2

How many people (staff, volunteers, students, partners, etc.) helped with those projects?

10

How many projects benefit monarchs, milkweed, or nectar plantings?

2

How many total square feet of habitat were created or enhanced?

100

Please check all that describe the habitats your affiliate helped to create or enhance last year with pollinator benefit in mind.

- Flower garden
- Vegetable garden
- Natural area with tree snags and stumps, and bare areas for ground nesting species
- Meadow
- School garden

Education & Outreach

Please describe pollinator conservation events or outreach activities in your community in 2024, indicating whether your committee hosted them or not.

In 2024, Chatham University apiary and farm teams lead a series of workshops on honeybee keeping, native pollinators, planting for pollinators, and more. We encourage learning opportunities for the conservation of native pollinators and their habitats.

How many pollinator-related events or outreach activities did you host or help with in 2024 (in total)?

15

How many people attended those events (in total)?

100

Curriculum, Continuing Education, & Service Learning

Please describe the curriculum your campus engaged in 2024, indicating whether it was part of a for-credit course or continuing education.

Chatham University offers several for-credit courses and workshops for students and community members to learn about IPM, organic vegetable production, beekeeping, native pollinators, etc.

How many of your for-credit courses included pollinator-related information in 2024?

3

How many students attended those for-credit courses?

25

Please describe the service-learning projects your students were engaged in 2024, indicating which, if any, were associated with a course.

n/a

Policies & Practices

Please describe actions taken to make pest management more pollinator-friendly.

On campus, we do not use synthetic chemicals and follow organic vegetable production practices on our organic certified farm. We actively use IPM and cultural methods for vegetable production and beekeeping.

In your city or campus, are any policy initiatives underway to further protect pollinators, people or waterways from pesticides?

n/a

Did your committee participate in any continuing education on ecologically-based Integrated Pest Management planning?

n/a

Any lessons learned you would like to share?

n/a
